Overall churn

About 1 in 5 customers churned (20.24%).

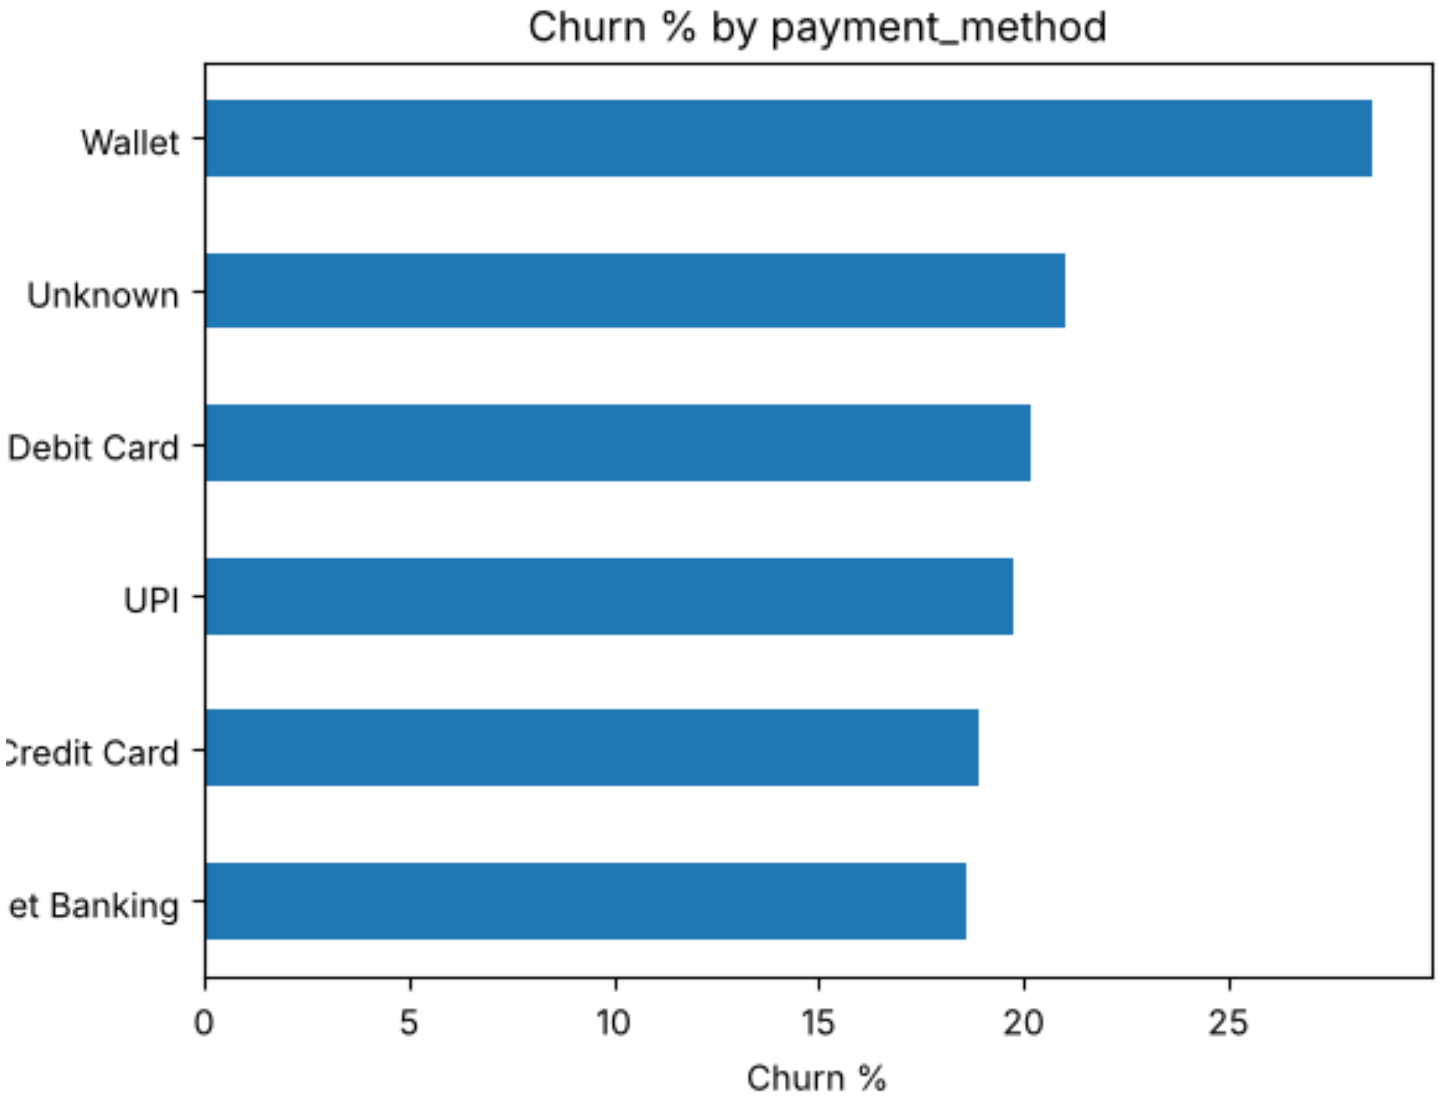

Churn by subscription plan

Mobile plan churns at 29%, Premium only 9.6%.

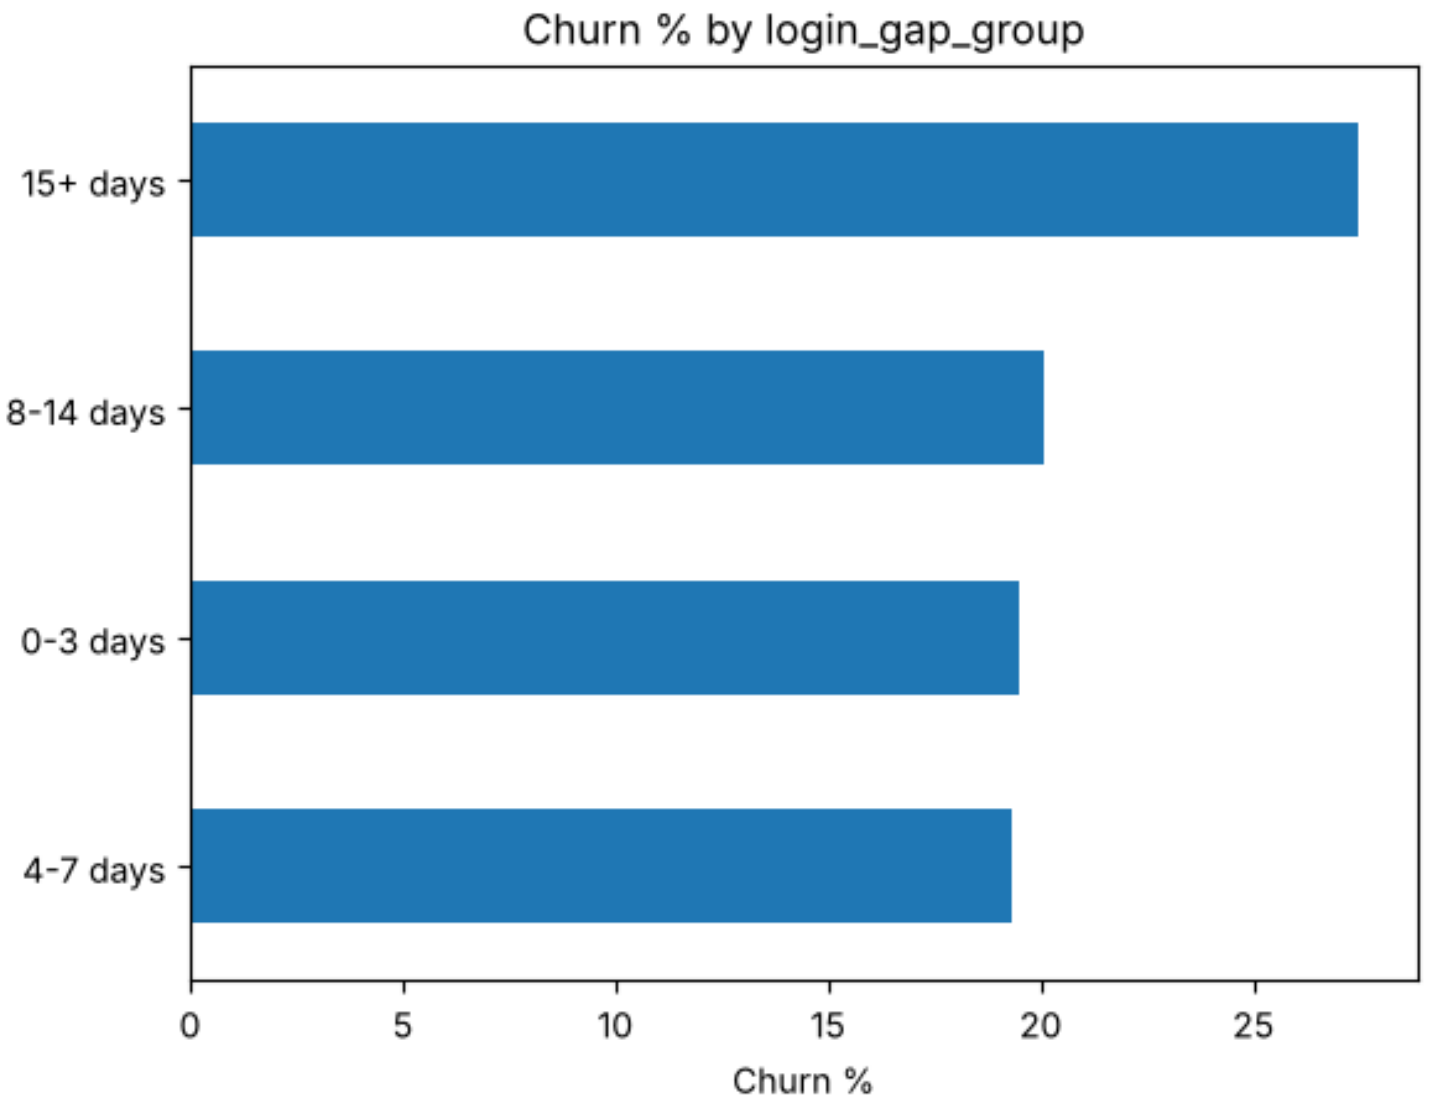

Churn by payment method

Wallet users churn the most (28.5%); other methods are near 19-20%.

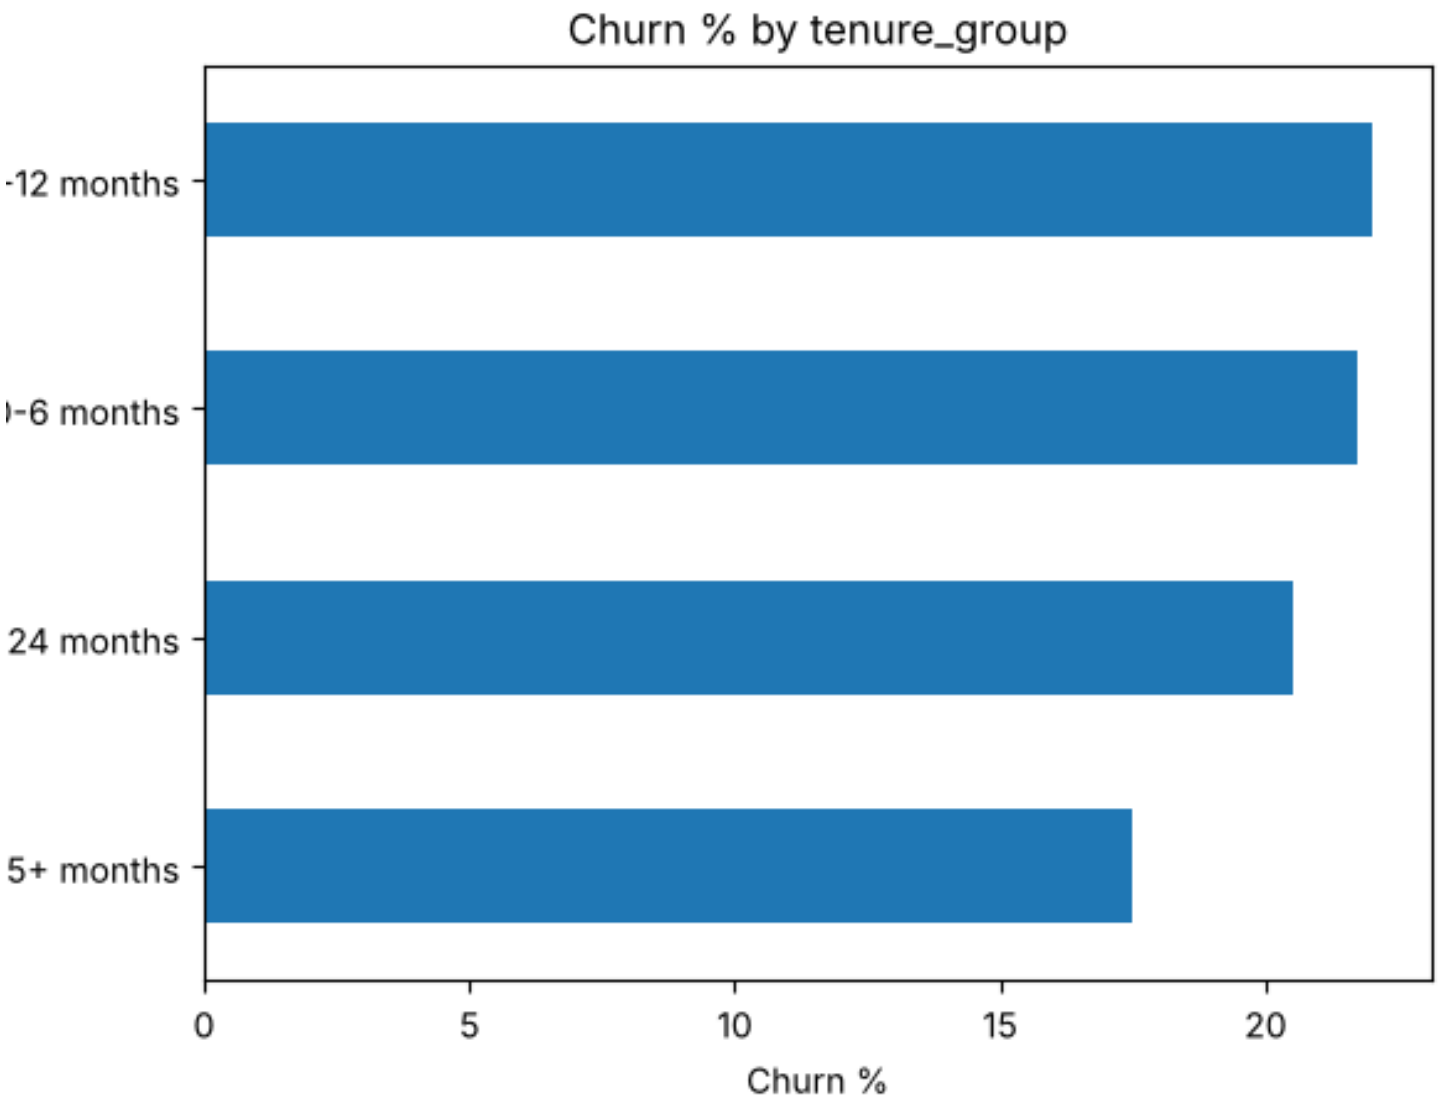

Churn by days since last login

Users inactive for 15+ days churn at 27.5%, against 19-20% for the rest.

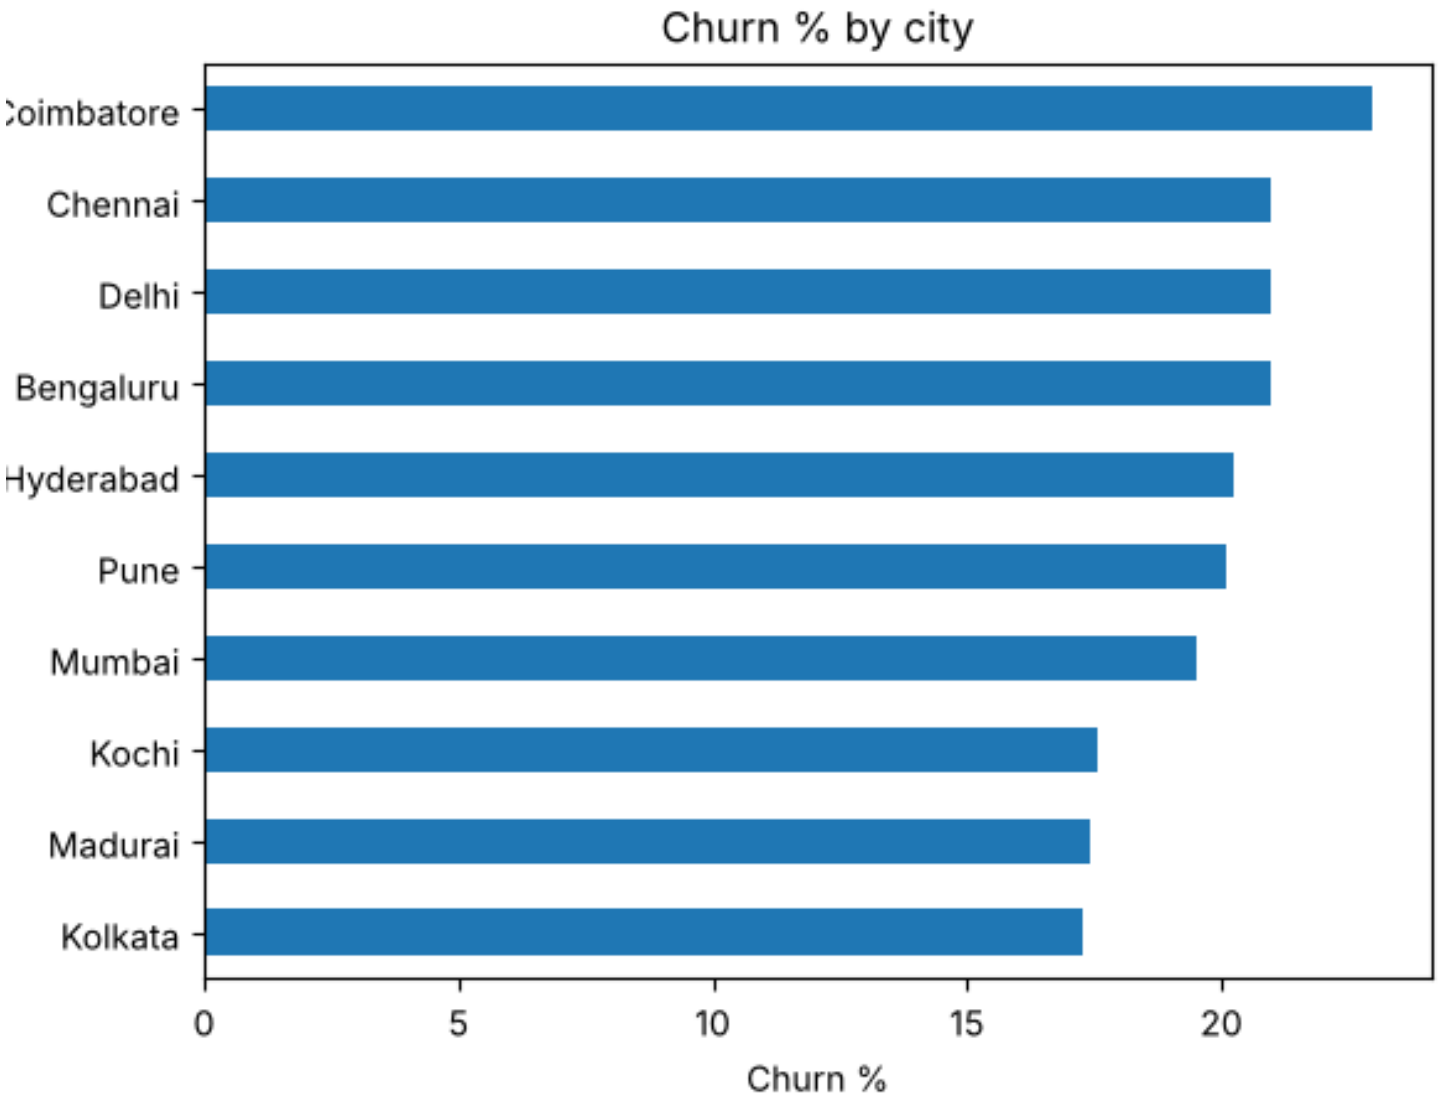

Churn by tenure

Newer subscribers churn more. 25+ months is the lowest (17.5%).

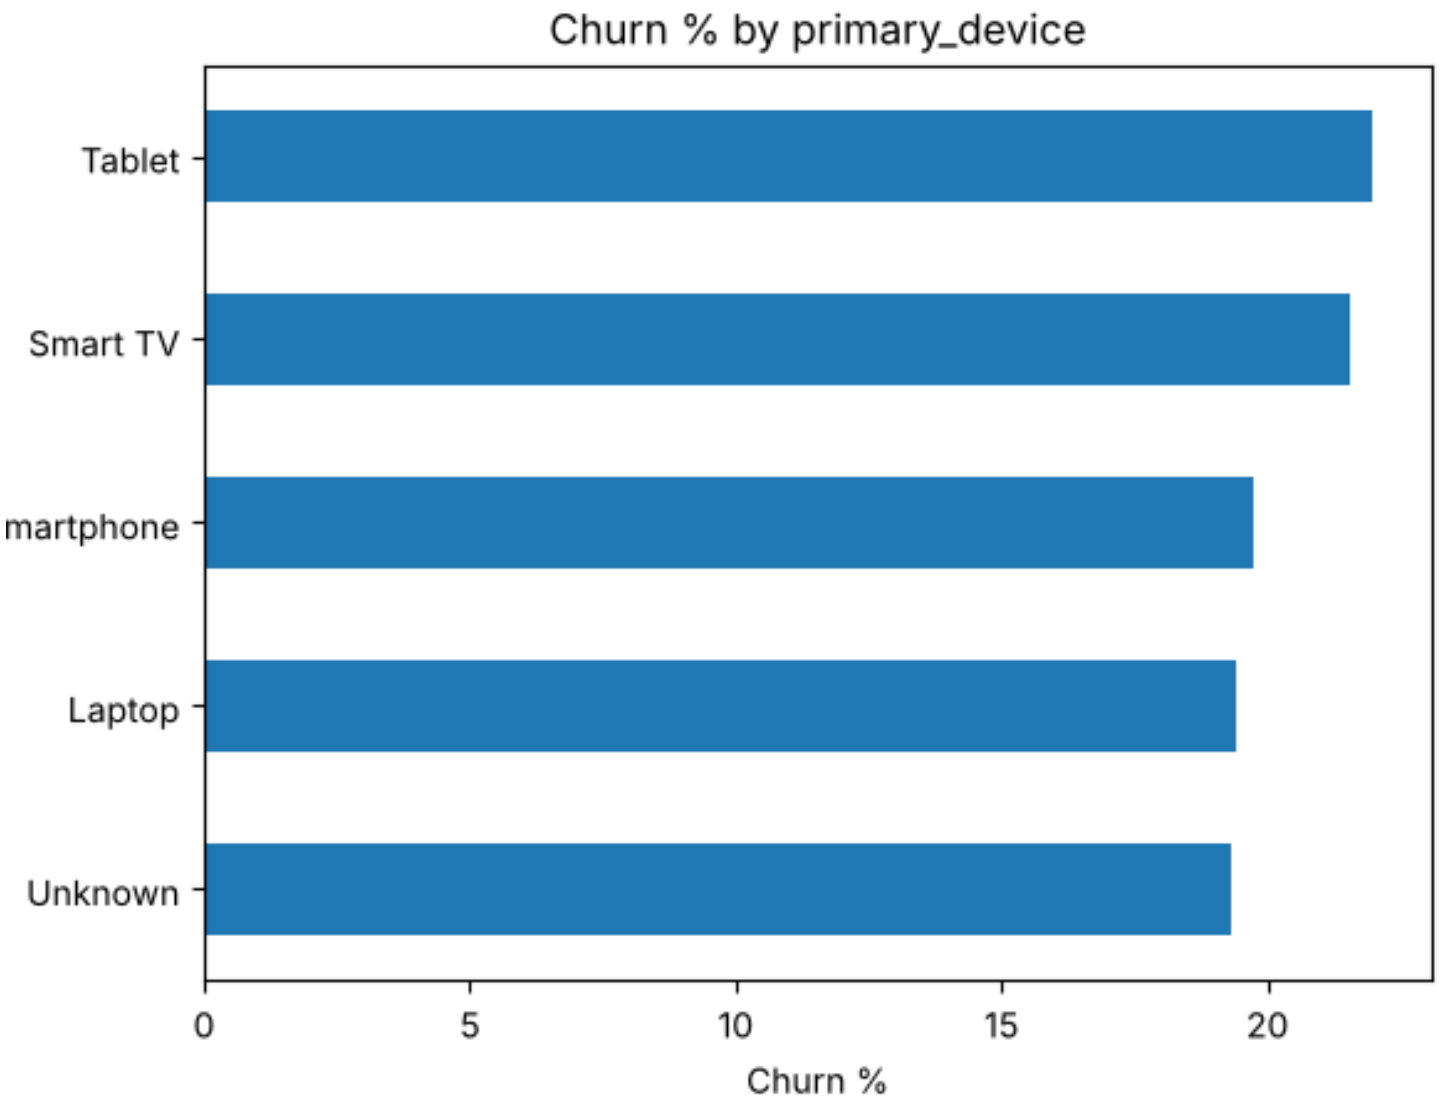

Churn by city

City matters little: 17.3% (Kolkata) to 23.0% (Coimbatore).

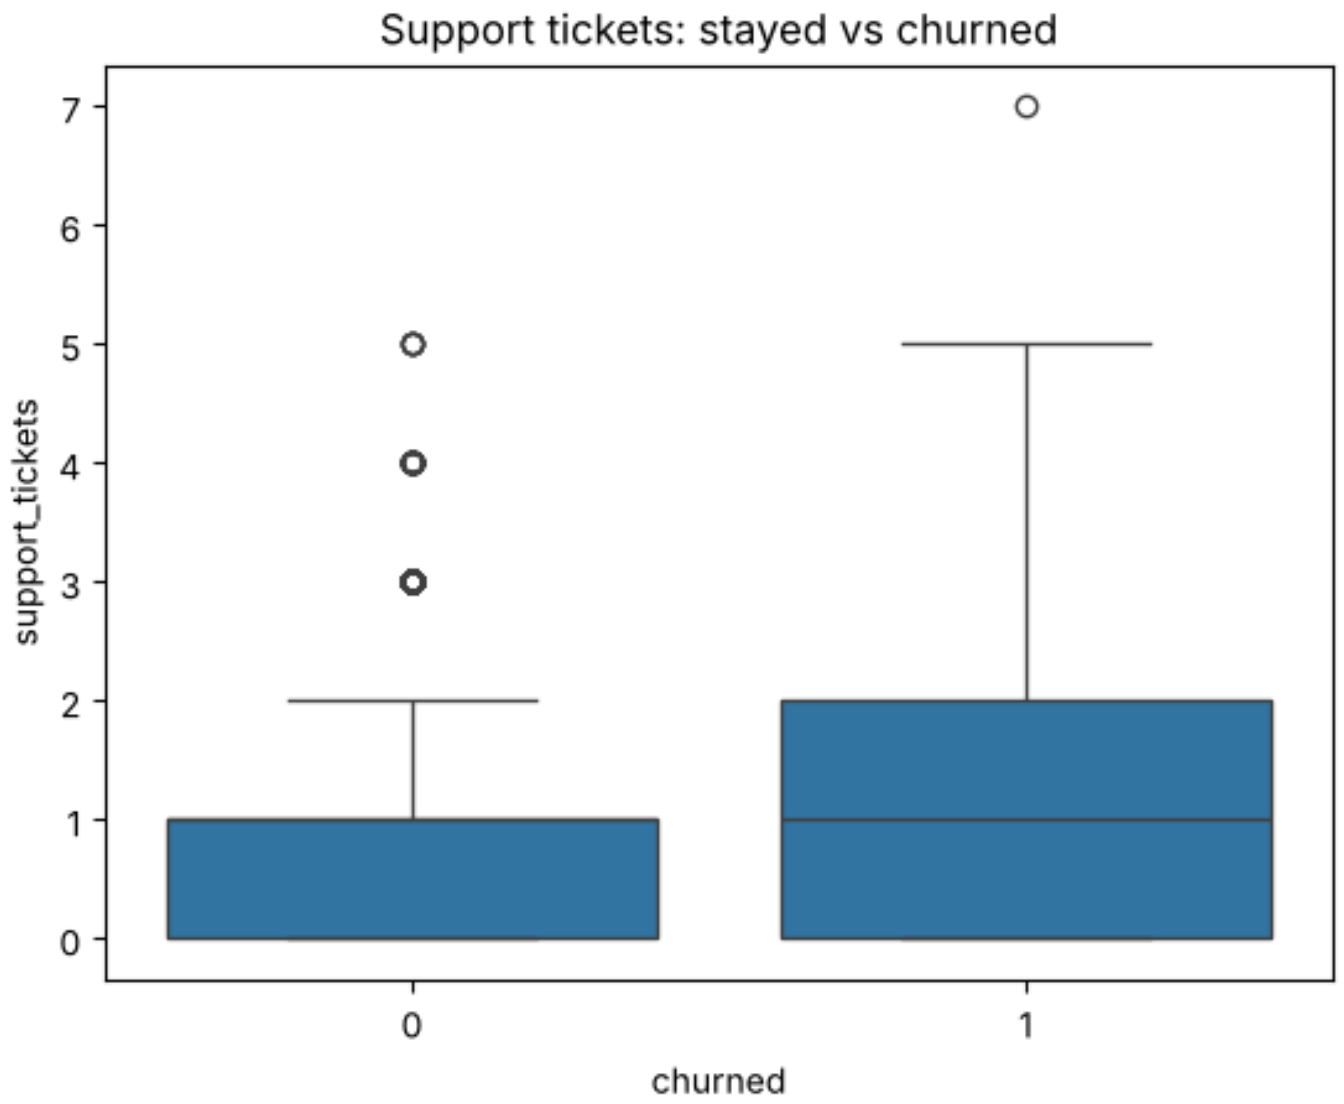

Churn by primary device

Device type makes little difference (19.3% to 22.0%).

Support tickets: stayed vs churned

Churned customers raised more tickets on average (1.21 vs 0.82).

Correlation heatmap

Support tickets have the strongest link with churn (+0.16). More viewing and better ratings go with staying.
